

QPMC Profile

Q-Project Management Consulting Ltd. (QPMC) was founded in 1996 to provide short-term Management Consulting services, focused on helping Clients to improve their organisational Information & Communication Technology.

This operational focus was broadened in 1998 with general Auditing and Risk Management services through an alliance with Methodware Ltd. providing the supporting software solutions. Since August 2012, we provide the same services and products with Thomson Reuters Accelus.

Since Information Security is critical within any business activity, another alliance was established with MicroWorld Technologies Inc. to assist Clients with advanced security solution implementations focussing on AntiVirus, AntiSpam, Content Security and Network Intrusion Prevention.

QPMC offices are located in Grobbendonk, Belgium, servicing the Benelux, Germany, Switzerland and France. Outside of Europe, Q-Project has partnerships that cover North, West and Central Africa through a close collaboration with Amyris Consultance in Abidjan, Ivory Coast and Consilium in Casablanca, Morocco.

All of the QPMC services are performed with highly qualified freelance professionals, each of them having a track record of proven competence in their specific domain of expertise.

The Client base exists of organisations of all sizes in different business sectors. Examples are the European Institutions, NATO, Haagse Transport Maatschappij, first line service providers and management consulting companies.
